Social activity

As a very active member of the Association of Greek Chemists and Lindau alumni society, I participate in many summer schools, trying to stimulate the interest of people in Chemistry, fight against chemophobia (leaflets, presentations) and organize numerous activities (live experiments) in schools concerning science in general. I enjoy playing chess (participating successfully in many tournaments), scrabble, reading scientific books involving Chemistry, Science and History, surfing on the web and traveling all around the world.
