

Los Arcos, Navarra, Spain, September 25<sup>th</sup> 2025

Att: To Whom It May Concern

We are reaching out to you because we are looking for candidates with a Bachelor's degree in Chemistry to join our organization. This opportunity is with Lurederra Technology Center and/or its affiliated company Tecnología Navarra de Nanoproductos SL, both located in Navarra region in Spain.

Lurederra Technology Centre is a Spanish technological centre well known in the area of nanotechnology that carries out research and applied technological development in production of nanomaterials, functional coatings and new materials. In addition, the centre counts with a line in environmental applications focused in recycling technologies and waste valorisation. The centre has a large trajectory in international research cooperation and participates actively in European programs.

TECNAN is a leading company in the production and commercialization of its own nano-based products including coatings and nanomaterials and it is set up internationally as supplier in Europe, Asia and South America.

Initially, we would offer a permanent contract with a gross annual salary in the order of 27,000-30,000€ and broad opportunities for promotion. Higher salary expectations and other conditions can be considered if the candidate's profile justifies it. In case needed, the company would arrange accommodation, which would be paid for by the employee. The interview will be conducted online.

The ideal profile we are seeking is someone who has completed their academic studies within the last five years, with specific training in Chemical Sciences or Chemical Engineering, a good level of English, and a willingness to settle in Spain—either permanently or for several years, if the experience proves successful. More advanced expertise, particularly in the field of nanoparticles and nanoproducts would also be positively valued.

We remain at your disposal to provide further information or clarify any doubts you may have regarding the activities to be carried out or the employment conditions. In any case, we are including our websites so you can learn more about our organizations and contact email:

[www.lurederra.es](http://www.lurederra.es)   [www.tecnan-nanomat.es](http://www.tecnan-nanomat.es)   [lurederra@lurederra.es](mailto:lurederra@lurederra.es)

We hope this initiative will be the beginning of a closer relationship with your organisation.

Kind regards,

  

Claudio Fernández  
Lurederra General Manager  
Tecnan President
